

Характеристики на продукта

Отличен материал: Избират се тополи с подходящ цикъл на растеж, с бистра зърно и равномерна текстура, което гарантира здравината и стабилността на дъските.

Висок стандарт за защита на околната среда: Използването на химикали е строго контролирано по време на обработката, което е в съответствие с международните екологични стандарти и защитава здравето на вас и вашето семейство.

Добра ефективност на обработката: Лесно за рязане, пробиване, издълбаване и други операции за обработка, за да отговорите на вашите нужди от разнообразие от творчески дизайн, независимо дали е да се правят мебели [\[Карбонизирана тополя с релефни мебели\]](#), Декоративни предмети или архитектурни компоненти с лекота.

Разнообразие от размери: Осигурете разнообразие от стандартни размери за ваш избор, но също така поддържайте персонализирани размери, за да отговорите на индивидуалните изисквания на различни проекти.

Богата повърхностна обработка: Можем да осигурим бял грунд и друга повърхностна обработка, а също така можем да персонализираме цвета според вашите нужди, за да отговорим на различни естетически и практически изисквания за приложение.

Добро изпълнение на защитата: Той има определени водоустойчиви, анти-скачащи и анти-посещения, които удължават експлоатационния живот на продукта и намаляват разходите за поддръжка.

[\[Китай карбонизирана тополя на едро\]](#)

Предимства на продукта

Светлина като перо, спестяване на труд: Плътност от само 0,42 g/cm³, 30% по-лека от дъба,

по-голяма работа с работното място и рязане.

Права текстура, стойност онлайн: Естествен светъл крем цвят меко дървено зърно, лесно адаптивен към скандинавския стил, стил на дневник, индустриален стил.

Лесен за обработка, приятелски настроен: Характеристики на меката дървесина, ръчна/механична обработка без налягане, гладки режещи ръбове без грапавост.

Екологично число сертифициране, повече спокойствие: Устойчивото сертифициране на горското стопанство на FSC не е задължително, намалява тежестта на земята и добавя към качеството

Изключителни предимства

Нулев формалдехиден ангажимент: Използването на екологично чисти лепила, чрез теста на SGS, семействата на майка и бебета може да бъде сигурно в употреба.

Ултра стабилно сушене: Съдържанието на вода е строго контролирано при 8%-12%, анти-крекинг и деформация, общи както за северния, така и на южния региони.

Персонализиране на едно гише: Лазерно гравирание, оформено рязане, пакетно боядисване - назове те търсенето, ние "ще го направим!"

CERTIFICATE OF APPROVAL

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP
ENGINEERING COUNTY, WEST CITY
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
