

Madera de álamo carbonizada Es un tipo de madera que se somete a un tratamiento térmico a alta temperatura, lo que mejora su durabilidad y resistencia a la corrosión. Su color se oscurece presentando un efecto estético único. Este proceso hace que la madera sea más estable, reduce la expansión o contracción causada por los cambios de humedad y mejora la resistencia a plagas y desastres naturales. La madera carbonizada también se considera un material respetuoso con el medio ambiente porque su producción no depende de conservantes químicos.

La madera de álamo carbonizada se usa comúnmente en muebles de exterior, cercas, terrazas y paisajismo. Su rendimiento estable también lo hace adecuado para su uso alrededor de piscinas y otros ambientes de alta humedad. Las propiedades respetuosas con el medio ambiente de la madera carbonizada la convierten en una opción popular en el diseño de edificios sostenibles, adecuada para paredes, suelos y decoración de interiores.

Somos una fábrica de tableros de madera maciza y melamina con más de 10 años de historia en China. Ahora cooperamos con más de 100 empresas de muebles, gabinetes, procesamiento de madera y comercialización de madera del mercado mundial de la madera.

Nuestra certificación

[illegible]

CERTIFICATE OF APPROVAL

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP
ENGINEERING COUNTY, WEST CITY
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
