

Խտուրջան տախտակը (միջին խտուրջան մանրաթելային MDF) հեշտ է պատել և մշակել տարբեր ձևերի՝ լավ կառուցվածքային ամբողջականությամբ և կայունությամբ: Խտուրջան տախտակի միատարր հատկությունները նաև հնարավորություն են տալիս այն ցուցադրել բարձրորակ ազդեցություն ներկերի մակերեսների և հարդարման վրա:

Խտուրջան տախտակները շատ հարմար են կահույքի արտադրության համար, ինչպիսիք են գգեստապահարանները, մահճակալի շրջանակները, գրասեղանները և հեռուստացույցի պահարանները: Նրա մշակման հեշտությունը նաև այն դարձնում է իդեալական ընտրություն ներքին հարդարման նախագծերի համար, ներառյալ բարդ զարդեր, դռներ և շրջանակներ փորագրելու համար: Ճարտարապետության մեջ խտուրջան տախտակները հաճախ օգտագործվում են մոդելներ և կադապարներ պատրաստելու համար, ինչպես նաև որպես հատակի ստորին շերտի նյութ:

Մենք պիճնդ փայտի և մեյլամինի տախտակի գործարան ենք, որն ունի ավելի քան 10 տարվա պատմություն Չինաստանում: Այժմ մենք համագործակցում ենք փայտի համաշխարհային շուկայի կահույքի, պահարանների, փայտամշակման և փայտի առևտրի ավելի քան 100 ընկերությունների հետ:

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
