

Karbonizuota tuopos mediena yra medienos rūšis, kuri yra termiškai apdorojama aukštoje temperatūroje, o tai padidina ilgaamžiškumą ir atsparumą korozijai. Jo spalva tamsėja, suteikdama unikalų estetinį efektą. Dėl šio proceso mediena tampa stabilesnė, sumažinamas plėtimasis ar susitraukimas dėl drėgmės pokyčių, pagerėja atsparumas kenkėjams ir stichinėms nelaimėms. Karbonizuota mediena taip pat laikoma aplinkai nekenksminga medžiaga, nes jos gamybai nereikia naudoti cheminių konservantų.

Karbonizuota tuopų mediena dažniausiai naudojama lauko balduose, tvorose, paklotuose ir apželdinant. Dėl stabilaus veikimo jis taip pat tinka naudoti prie baseinų ir kitose didelės drėgmės aplinkose. Dėl aplinkai nekenksmingų karbonizuotos medienos savybių ji yra populiarus pasirinkimas tvariame pastatų projekte, tinka sienoms, grindims ir vidaus apdailai.

Mes esame masyvo ir melamino plokščių gamykla, turinti daugiau nei 10 metų istoriją Kinijoje. Šiuo metu bendradarbiaujame su daugiau nei 100 baldų, spintų, medienos apdirbimo ir medienos prekybos įmonių iš pasaulinės medienos rinkos.

**CERTIFICATE OF APPROVAL**

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP  
ENGINEERING COUNTY, WEST CITY  
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
