

Ang density ng board (medium density fiberboard MDF) ay madaling i-coat at iproseso sa iba't ibang hugis, na may mahusay na integridad at katatagan ng istruktura. Ang mga homogenous na katangian ng density board ay nagbibigay-daan din dito na magpakita ng mataas na kalidad na mga epekto sa mga ibabaw ng pintura at mga pagtatapos.

[serye ng sining melamine board](#) ay napaka-angkop para sa paggawa ng muwebles, tulad ng mga wardrobe, bed frame, desk, at TV cabinet. Ang kadalian ng pagproseso nito ay ginagawa rin itong perpektong pagpipilian para sa mga proyekto sa interior decoration, kabilang ang pag-ukit ng mga kumplikadong dekorasyon, pinto, at frame. Sa arkitektura, ang mga density ng board ay kadalasang ginagamit upang gumawa ng mga modelo at template, pati na rin bilang isang materyal para sa mas mababang layer ng sahig.

Kami ay isang solid wood at melamine board factory na may higit sa 10 taon ng kasaysayan sa China. Ngayon, nakikipagtulungan kami sa higit sa 100 muwebles, cabinet, pagpoproseso ng kahoy, at mga kumpanya sa pangangalakal ng kahoy mula sa pandaigdigang merkado ng kahoy.

Ang aming sertipikasyon
