

Carbonized poplar wood ay isang uri ng kahoy na sumasailalim sa high-temperature heat treatment, na nagpapataas ng tibay at corrosion resistance. Nagdidilim ang kulay nito, na nagpapakita ng kakaibang aesthetic effect. Ang prosesong ito ay ginagawang mas matatag ang kahoy, binabawasan ang pagpapalawak o pagliit na dulot ng mga pagbabago sa halumigmig, at pinapabuti ang paglaban sa mga peste at natural na sakuna. Ang carbonized na kahoy ay itinuturing din na isang materyal na palakaibigan sa kapaligiran dahil ang produksyon nito ay hindi umaasa sa mga kemikal na preserbatibo.

Ang carbonized poplar wood ay karaniwang ginagamit sa panlabas na kasangkapan, bakod, deck, at landscaping. Ang matatag na pagganap nito ay ginagawang angkop din para sa paggamit sa paligid ng mga swimming pool at iba pang mga kapaligiran na may mataas na kahalumigmigan. Ang mga katangiang pangkapaligiran ng carbonized na kahoy ay ginagawa itong popular na pagpipilian sa napapanatiling disenyo ng gusali, na angkop para sa mga dingding, sahig, at panloob na dekorasyon.

Kami ay isang solid wood at melamine board factory na may higit sa 10 taon ng kasaysayan sa China. Ngayon, nakikipagtulungan kami sa higit sa 100 muwebles, cabinet, pagpoproseso ng kahoy, at mga kumpanya sa pangangalakal ng kahoy mula sa pandaigdigang merkado ng kahoy.

Ang aming sertipikasyon

[illegible]

CERTIFICATE OF APPROVAL

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP
ENGINEERING COUNTY, WEST CITY
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
