

Karbonizowane drewno paulowni to gatunek drewna poddawany obróbce cieplnej w wysokiej temperaturze, co zwiększa trwałość i odporność na korozję. Jego kolor ciemnieje, dając niepowtarzalny efekt estetyczny. Proces ten powoduje, że drewno staje się bardziej stabilne, ogranicza rozszerzanie się i kurczenie pod wpływem zmian wilgotności, a także zwiększa odporność na szkodniki i klęski żywiołowe. Drewno karbonizowane jest również uważane za materiał przyjazny dla środowiska, ponieważ przy jego produkcji nie stosuje się chemicznych środków konserwujących.

Karbonizowane drewno paulowni jest powszechnie stosowane w meblach ogrodowych, płotach, tarasach i architekturze krajobrazu. Jego stabilne działanie sprawia, że nadaje się również do stosowania w pobliżu basenów i innych środowisk o dużej wilgotności. Przyjazne dla środowiska właściwości karbonizowanego drewna sprawiają, że jest ono popularnym wyborem w zrównoważonym projektowaniu budynków, odpowiednim do ścian, podłóg i dekoracji wnętrz.

Jesteśmy fabryką płyt z litego drewna i melaminy z ponad 10-letnią historią w Chinach. Obecnie współpracujemy z ponad 100 firmami meblarskimi, szafowymi, zajmującymi się obróbką drewna i handlem drewnem ze światowego rynku drzewnego.

Nasza certyfikacja

CERTIFICATE OF APPROVAL

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP
ENGINEERING COUNTY, WEST CITY
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
