

[High-gloss block board](#), also known as high-gloss joinery, is made of high-quality wood spliced into a core board, laminated with veneer or plywood on both sides, and finally treated with high-gloss. The core board is usually made of dried and screened wood strips, which ensures a stable structure and is not easy to deform; the laminated veneer or plywood further enhances the strength and flatness of the board, and the high-gloss process gives it a unique appearance and performance.

Appearance characteristics

High gloss: the surface shows a mirror-like glossy effect, reflecting light, making the space more bright and transparent, adding a sense of fashion and atmosphere to the furniture or decoration, especially favored by consumers pursuing modern minimalist style.

Rich color: can achieve a variety of color choices, from classic black and white gray to colorful bright colors, can fully meet the different decoration styles and personalized needs, whether it is to create a warm home atmosphere, or to create a stylish commercial space, can be perfectly adapted.

Fine texture: retaining the natural texture of wood, delicate and clear, both the natural texture of wood and high-gloss exquisite gorgeous, unique visual effect.
