

The specifications of poplar LVL products are flexible, with thickness ranging from 10mm to 300mm, and width and length can also be cut according to customer needs. This flexibility enables poplar LVL to adapt to various construction and packaging needs.

The material has the characteristics of export fumigation free, good strength, and straightness, making it an ideal choice to replace solid wood. The product has also passed RoHS 6 tests and environmental protection tests to ensure the quality and safety of the product

The diversity and flexibility of poplar LVL products make it an indispensable material in the construction and packaging industries. Whether in terms of material, specifications, adhesive usage, or characteristics and uses, poplar LVL has demonstrated its advantages as a high-quality building and packaging material. In addition, its environmental performance and customized services have won the favor of customers

We are a solid wood and melamine board factory with over 10 years of history in China. Now, we cooperate with more than 100 furniture, cabinets, wood processing, and wood trading companies from the global wood market.
