

Lemn de paulownia carbonizat este un tip de lemn care suferă un tratament termic la temperatură ridicată, care sporește durabilitatea și rezistența la coroziune. Culoarea sa se întunecă, prezentând un efect estetic unic. Acest proces face lemnul mai stabil, reduce expansiunea sau contractia cauzate de schimbările de umiditate și îmbunătățește rezistența la dăunători și dezastre naturale. Lemnul carbonizat este, de asemenea, considerat un material prietenos cu mediul, deoarece producția sa nu se bazează pe conservanți chimici.

Lemnul de paulownia carbonizat este folosit în mod obișnuit în mobilier de exterior, garduri, punți și amenajări. Performanța sa stabilă îl face potrivit și pentru utilizarea în jurul piscinelor și a altor medii cu umiditate ridicată. Proprietățile ecologice ale lemnului carbonizat îl fac o alegere populară în designul durabil al clădirilor, potrivit pentru pereți, podele și decorațiuni interioare.

Suntem o fabrică de lemn masiv și plăci melaminate cu peste 10 ani de istorie în China. Acum, cooperăm cu peste 100 de companii de mobilier, dulapuri, prelucrare a lemnului și comerț cu lemn de pe piața globală a lemnului.
