

Обзор продукта

Карбонизированный тополь ([Китайская доска из розового дерева](#)) является своего рода модифицированным древесином после высокотемпературной карбонизационной обработки, используя высококачественные тополя в качестве сырья и в высокотемпературной среде для обработки пиролиза, так что физические и химические свойства изменения древесины, таким образом, получая более превосходную производительность Полем

Характеристики

Экологически чистый и здоровый: карбонизированный физическими методами, не добавляя какие-либо химические вещества, нетоксичные, безвредные, безопасные и экологически чистые, в соответствии с международными экологическими стандартами.

Антикоррозия и анти-инсекты: высокотемпературная среда эффективно убивает грибки и яйца насекомых в древесине, разрушая их живую среду, придавая древесине превосходные антикоррозионные и анти-инсективные свойства и продлевая срок службы.

Стабильность и долговечность: процесс карбонизации уменьшается ([Китай оптом из термолевой древесины](#)) поглощение влаги древесины, улучшает размерную стабильность и делает ее менее восприимчивым к деформации и растрескиванию, что делает его подходящим для широкого диапазона климатических условий.

Натуральная текстура: карбонизированная древесина имеет более четкую и более естественную текстуру, мягкий цвет и уникальный декоративный эффект и может быть карбонизирована до разных глубин, чтобы получить различные цветовые эффекты в соответствии с спросом.

Легко поддерживать: поверхность карбонизированного дерева тополя обрабатывается, чтобы его легко чистить и поддерживать, необходимо регулярно наносить деревянное восковое масло, чтобы сохранить его красоту и производительность. □

Приложение

Благодаря отличной производительности, карбид тополя широко используется в следующих областях:

Внутреннее украшение: напольные покрытия, настенные панели, потолок, мебель, лестница, двери и окна и т. Д.

Открытый пейзаж: пол, забор, цветочный ящик, павильон, деревянный дом, платформа для воды и т. Д.

Другие поля: ручной работы, музыкальные инструменты, упаковочные материалы и т. Д.

Спецификация продукта

Спецификации карбонизированного тополя могут быть настроены в соответствии с требованиями клиентов, общие спецификации включают:

Толщина: 15 мм, 20 мм, 25 мм, 30 мм и т. Д.

Ширина: 90 мм, 120 мм, 140 мм, 160 мм и т. Д.

Длина: 900 мм, 1200 мм, 1500 мм, 1800 мм и т. Д.

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
