

[Карбонизовано дрво пауловније](#) је врста дрвета која се подвргава топлотној обради на високим температурама, што повећава издржљивост и отпорност на корозију. Његова боја потамни, представљајући јединствен естетски ефекат. Овај процес чини дрво стабилнијим, смањује ширење или стезање узроковано променама влажности и побољшава отпорност на штеточине и природне катастрофе. Карбонизовано дрво се такође сматра еколошки прихватљивим материјалом јер се његова производња не ослања на хемијске конзервансе.

Карбонизовано дрво пауловније и [Ватрено кири дрво](#) се обично користи у спољном намештају, оградама, палубама и уређењу пејзажа. Његове стабилне перформансе такође га чине погодним за употребу око базена и других окружења са високом влажношћу. Еколошки прихватљива својства карбонизованог дрвета чине га популарним избором у одрживом дизајну зграда, погодним за зидове, подове и унутрашњу декорацију.

Ми смо фабрика плоча од пуног дрвета и меламина са више од 10 година историје у Кини. Сада сарађујемо са више од 100 компанија за намештај, ормаре, дрвопрераду и трговину дрветом са светског тржишта дрвета.

Наш сертификат

**CERTIFICATE OF APPROVAL**

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP  
ENGINEERING COUNTY, WEST CITY  
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
