

Преглед производа

Карбонизовани топола ([Кинески одбор од ружиног дрвета](#)) је врста модификованог дрвета након третмана од високог температурног карбонизације, користећи висококвалитетни топола као сировина и под високом температурном окружењем за третман пиролизе, тако да физичка и хемијска својства промене дрвета, тако да добијају одличније перформансе.

Карактеристике

Еколошки прихватљиви и здрави: карбонизовани физичким методама, без додавања хемикалија, нетоксичних, безопасних, сигурних и еколошки прихватљивих, у складу са међународним еколошким стандардима.

Анти-корозивна и антисекти: окружење високог температура ефикасно убија гљивице и јаја инсеката у шуми, уништавајући њихово животну средину, дајући дрва одличне антикорозивне и анти-инсективне својства и продужавајући свој радни век.

Стабилност и трајност: Процес карбонизације смањује апсорпцију влаге дрвета, побољшава стабилност димензије и чини га мање подложним на деформације и пуцање, што га чини погодним за широк спектар климатских услова.

Природна текстура: карбонизовано дрво има јаснију и природнију текстуру, меку боју и јединствени декоративни ефекат и може се угрозити на различите дубине да би се добило различите ефекте боја у складу са потражњом.

Једноставан за одржавање: Површина карбонизованог тополног дрвета третира се као лако чишћење и одржавање, само је потребно редовно да редовно нанесете восак дрвета да би задржали његову лепоту и перформансе.,

([Кина карбонизирана производња топола](#))

Примена

Због својих одличних перформанси, топола карбида се широко користи у следећим областима:

Унутрашња декорација: Подови, зидни панели, плафон, намештај, степенице, врата и прозори итд.

Отворени пејзаж: спрат, ограда, кутија за цветање, павиљон, дрвена кућа, платформа прилагођена водоточи итд.

Остала поља: рукотворине, музички инструменти, амбалажни материјали итд.

Спецификација производа

Спецификације карбонизоване тополе ([Велепродаја термоарног дрвета у Кини.](#)) Може се прилагодити према потребама купаца, заједничке спецификације укључују:

Дебљина: 15 мм, 20 мм, 25 мм, 30 мм итд.

Ширина: 90 мм, 120 мм, 140 мм, 160 мм итд.

Дужина: 900мм, 1200 мм, 1500 мм, 1800 мм итд.

CERTIFICATE OF APPROVAL

SHANDONG MUZHIYUAN INDUSTRIAL DEVELOPMENT CO., LTD.

PEROTI, LINDA A. ADMINISTRATIVE MANAGER, DAYTON TOWNSHIP
ENGINEERING COUNTY, WEST CITY
SHANDON, MISSOURI

has demonstrated state-of-the-art inspection and monitoring, the accuracy of the product equivalent to that of the best. The following are the key features of the product:

- **High Accuracy:** The product is designed to provide accurate measurements of the product's physical properties, such as its weight, volume, and density.
- **High Precision:** The product is designed to provide precise measurements of the product's physical properties, such as its weight, volume, and density.
- **High Reliability:** The product is designed to provide reliable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Efficiency:** The product is designed to provide efficient measurements of the product's physical properties, such as its weight, volume, and density.
- **High Flexibility:** The product is designed to provide flexible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Scalability:** The product is designed to provide scalable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Security:** The product is designed to provide secure measurements of the product's physical properties, such as its weight, volume, and density.
- **High Compatibility:** The product is designed to provide compatible measurements of the product's physical properties, such as its weight, volume, and density.
- **High Interoperability:** The product is designed to provide interoperable measurements of the product's physical properties, such as its weight, volume, and density.
- **High Integration:** The product is designed to provide integrated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Automation:** The product is designed to provide automated measurements of the product's physical properties, such as its weight, volume, and density.
- **High Customization:** The product is designed to provide customized measurements of the product's physical properties, such as its weight, volume, and density.
- **High Adaptability:** The product is designed to provide adaptable measurements of the product's physical properties, such as its weight, volume, and density.
